SANTIAGO GONZALEZ SIORDIA

SOFTWARE ENGINEER

Analytical, proactive, and responsible. I am honest and I like trustworthy companies. I like challenges and things well-done, I really enjoy learning. I am passionate about new technologies and how we apply them in our lives. I am good with numbers and data analysis. My main hobbies are playing video games and playing piano or ukulele.

- **Udemy - The complete React developer course** — FINISHED IN MAY 2020
- **Generation USA - Java Full-stack development** — SEPT 2019 - MAR 2020

PROFESSIONAL EXPERIENCE

Wizeline (Software engineer) — SEPT 2021 - CURRENTLY

This part of my professional development has really helped me earn all kinds of experiences. Starting projects, architecting, building cohesive teams, and speaking with clients. I've kept on practicing many **JavaScript** Technologies such as **React**, **NodeJS**, and **React Native**.

I've had the opportunity to create a community, teach my knowledge, interview new hires, and decide significant paths for projects, dates, the capacity of teams, and many more things.

Cyberpuerta.mx (Software engineer) — SEPT 2020 - SEPT 2021

Alongside another great developer, I created from scratch to finish the Cyberpuerta app in **React Native**: A technology e-commerce with beautiful UX and UI that allows anyone with Android or iPhone to buy electronics easily.

I was a decisive part of the **architecture and technologies** we used. Developed a **CI/CD** strategy and **helped engineers** getting up to speed with the project, I also helped them with debugging problems and conceptual doubts.

Wolfcode.mx (Software engineer) — MAY 2020 - SEPT 2020

As a part of a startup I was in charge of different tasks. We started and launched some apps. The most important was a social network for musicians.

Here I learned **teamwork, git,** and I finally got to professionally practice my academic knowledge. I started using **Typescript** and fully understood **Redux, React,** and I also learned **project management with Jira.**

Freelance (Full stack software engineer) — SEPT 2018 - MAY 2020

I worked for friends and family, then got restaurants, bars, and clubs as clients, I developed mainly with **ReactJS.**
